

## India's Export Data (2022–2024)

This dataset provides insights into **India's export performance** across various products and destination countries from **2022 to 2024**. The data is recorded in **USD (Billion)** and categorized under the following key attributes:

- **Country:** The destination country for India's exports.
- **Product:** The type of product exported.
- **2022 (USD Billion):** Export value for the year 2022.
- **2023 (USD Billion):** Export value for the year 2023.
- **2024 (USD Billion):** Export value for the year 2024.

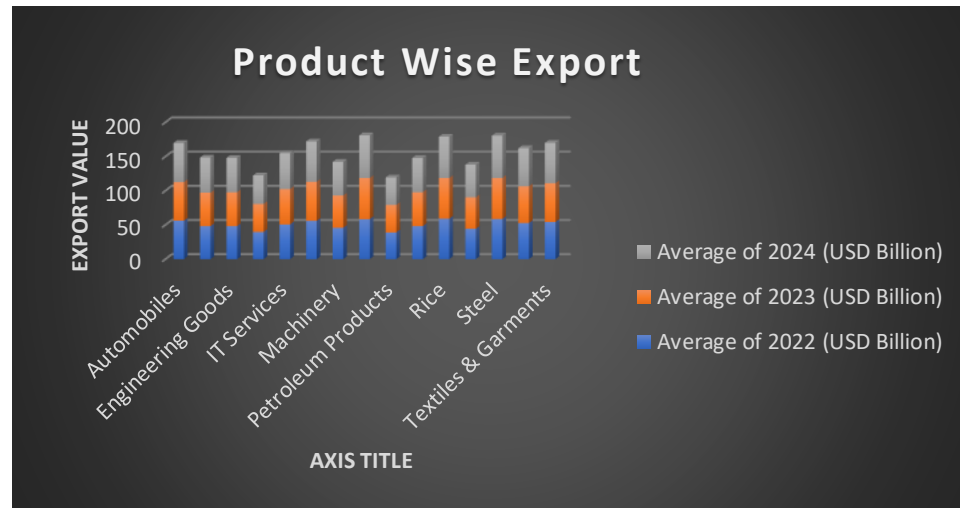

Kindly frame by referring to the above written notes and make on export data

- 1) Download the Excel file.
- 2) Create a pivot chart using the Product , Years (2022 2023, 2024).
- 3) Customize this chart using chart elements, styles and colours to make it better.
- 4) Create a pivot chart using the Product and country.
- 5) Then customize the chart to make it better.
- 6) Create a pivot chart using the country and years (2022 2023, 2024).
- 7) Then customize the chart to make it better.
- 8) Create another pivot chart using the country and year ( 2024)
- 9) Then customize the cart to make it better.
- 10) Modify the pivot chart using chart elements, styles, and colour.

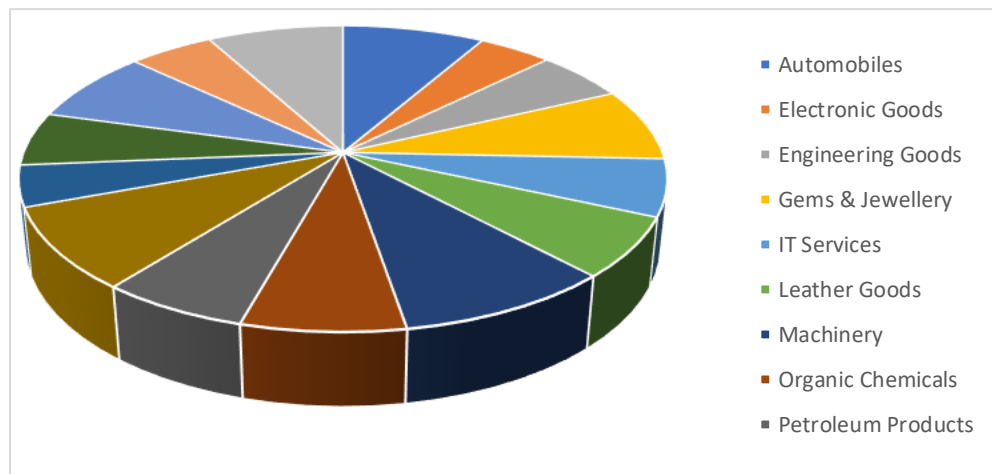

After completing the above exercise, you can share the Excel file with me.

## Solution on Ms Excel:

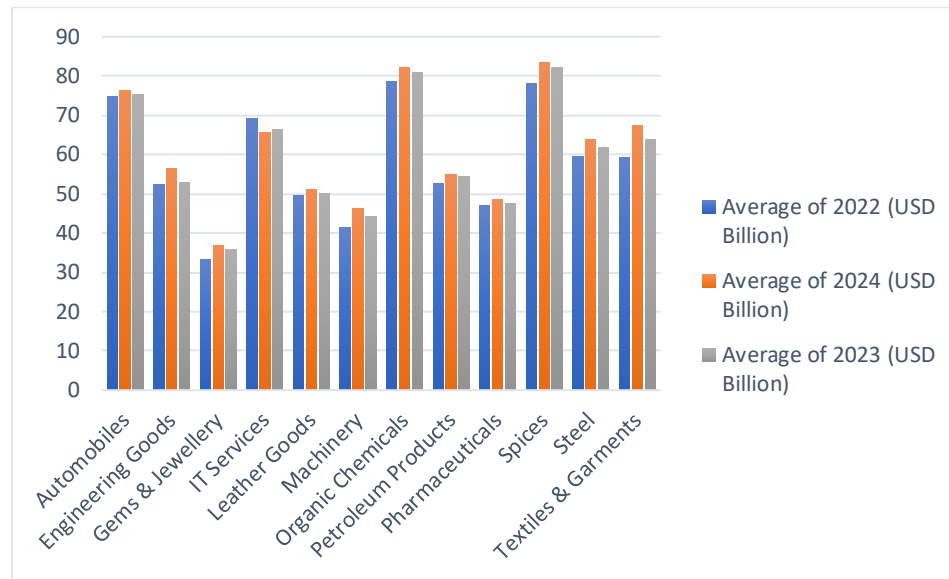

### 1) Product wise Export

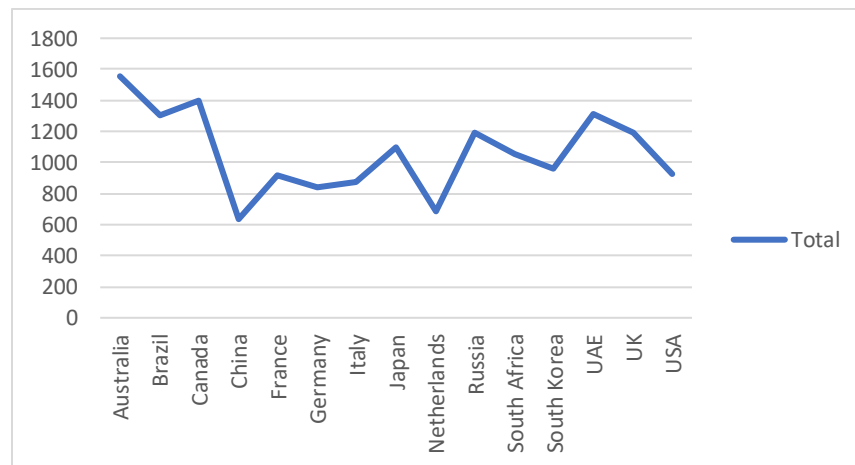

### 2) Product wise data

### 3) Brazil Data

### 4) Country wise data (2024)

- 1) Which **countries** have shown the highest growth in import value from India over the three-year period?
- 2) How does India's export performance **compare to competing countries** in Gems and jewellery?
- 3) Based on the **growth rate trends**, which product categories are likely to see increased exports in 2025?
